PROFILE & SETTINGS

- Update personal details
- Manage pets (add/edit/remove)

- Toggle notifications (reminders ON/OFF)
- Privacy settings
- Delete account request

3rd Party API Integrations

For Ticket Booking, integrating with various third-party APIs can enhance functionality and improve the overall user experience.

Payment Gateway Integration (e.g., Razorpay): (One Payment Gateway)

This integration allows users to make secure online payments for their orders. Users can use their credit/debit cards or bank accounts to the app and make payments seamlessly.

SMS Gateway Integration :

SMS gateway integration enables the app to send order confirmations, OTPs, and notifications to users via SMS. It ensures effective communication and order tracking.

Whatsapp API Integration :

Whatsapp gateway integration enables the app to send order confirmations, OTPs, and notifications to users via Whatsapp. It ensures effective communication and order tracking.

Push Notification Services (e.g., Firebase Cloud Messaging, Apple Notification Service): Push notification services enable real-time updates and alerts to be sent to users' devices. These notifications can include order updates, promotions, and reminders, enhancing user engagement
